### **ABSTRACT**

The purposes of this study were to investigate the existing condition of academic administration of the Primary Education Offices; and to investigate the problems and needs concerning academic administration of the Primary Education Offices in Nakhon Phanom Province.

The selected sample was 590 personnel including 10 heads of the Primary Education Offices, 6 deputy heads of the Primary Education Offices, 35 district educational supervisors, 185 school administrators and 354 teachers.

The data were analyzed by a SPSS computer program to calculate percentage, arithmetic mean and standard deviation.

## Findings

The results of this study were as follows :

1. The condition of academic administration was at the "under average" level in the following tasks : educational research, supervision development and promotion of internal supervision, educational service and educational technology as well as co-ordination and dissemination of academic documents.

2. The problems of academic administration were at the "under average" level in the following tasks : follow-up and educational evaluation, educational research, promotion of internal supervision, educational technology, administration and task performance as well as co-ordination and dissemination of academic documents.

3. The needs upon academic administration were at high level in the following tasks : supervision follow-up and educational evaluation, supervision development and promotion of internal supervision, educational technology administration and task performance as well as co-ordination and dissemination of academic documents.
