

## REFERENCES – FINAL REPORT

1. สง่า ตั้งชวาล (2541)  
 “เสถียรภาพของการขุดเจาะ”, สำนักพิมพ์แห่งจุฬาลงกรณ์มหาวิทยาลัย พร้อม  
 แผ่นโปรแกรม STABIL.EXE หลังปก 228 หน้า
2. สง่า ตั้งชวาล (2544)  
 “การประเมินความเสี่ยงและความเชื่อถือได้ของเสถียรภาพของงานขุดเจาะบนพื้นผิวดินและ  
 ใต้ผิวดิน”, รายงานฉบับสมบูรณ์ ทุนวิจัย กองทุนรัชดาภิเษกสมโภช ส่วนส่งเสริมและพัฒนาวิจัย  
 สำนักบริหารวิชาการ จุฬาลงกรณ์มหาวิทยาลัย 207 หน้า
3. สง่า ตั้งชวาล (2546)  
 “บ่อเหมืองเปิดที่เหมาะสมที่สุด สำหรับงานขุดเจาะในเหมืองแร่และเหมืองหิน”, รายงานวิจัย  
 ฉบับสมบูรณ์ โครงการวิจัยเลขที่ 62G-MN-2545 ฝ่ายวิจัย คณะวิศวกรรมศาสตร์ จุฬาลงกรณ์  
 มหาวิทยาลัย พร้อมแผ่นโปรแกรม Slope Cut Design 254 หน้า
4. สง่า ตั้งชวาล (2551)  
 “ธรณีเทคนิคเชิงวิเคราะห์”, สำนักพิมพ์แห่งจุฬาลงกรณ์มหาวิทยาลัย 555 หน้า
5. Ang, A. H-S. and W.H. Tang (1975)  
 “Probability Concepts in Engineering Planning and Design: Vol. I Basic Principles”,  
 John Wiley & Sons Inc., New York, U.S.A., 409 pages.
6. Ang, A. H-S. and W.H. Tang (1984)  
 “Probability Concepts in Engineering Planning and Design: Vol. II Decision, Risk and  
 Reliability”, John Wiley & Sons Inc., New York, U.S.A., 562 pages.

7. Ang, A. H-S. and W.H. Tang (2007)

“Probability Concepts in Engineering: Emphasis on Applications to Civil and Environmental Engineering: 2<sup>nd</sup> Edition, John Wiley & Sons, Inc., 406 pages.

8. Athanasiou-Grivas, D. (1979)

“Probabilistic Evaluation of Safety of Soil Structures”, Journal of the Geotechnical Engineering Division, ASCE, Vol.105, No. GT9, pp. 109-115.

9. Balasubramaniam, A.S. and Others (1989)

“Excavations in Bangkok Sub-Soils” Thirteenth Southeast Asian Geotechnical Conference, Asian Institute of Technology, Thailand.

10. Bergado, D.T., P.V. Long, C.H. Lee, K.H. Loke, and G. Werner (1994)

“Performance of Reinforced Embankment on Soft Bangkok Clay with High-Strength Geotextile Reinforcement”, International Journal of Geotextile and Geomembranes”, Vol. 13, pp. 403-420.

11. Canada Centre for Mineral and Energy Technology (1976)

“Pit Slope Manual: Chapter 1 Summary”, CANMET Report 76-22, Mines and Resources Canada, Ministry of Supply and Services Canada, Ottawa, Canada., 65 pages.

12. Christian, J.T. (1996)

“Reliability Methods for Stability of Existing Slopes”, Proceedings of Uncertainty '96: Uncertainty in the Geologic Environment: From Theory to Practice, Madison, WI., [Also in ASCE Geotechnical Special Publication 58], pp. 409-418.

13. Christian, J. T., C. C. Ladd and G. B. Baecher (1994)

“Reliability Applied to Slope Stability Analysis”, Journal of Geotechnical Engineering Division, ASCE, Vol. 120, No. GT 12, pp. 700-702.

14. Christian, J.T. and G.B. Baecher (2001)

Discussion on “Factor of safety and Reliability in Geotechnical Engineering” by J.M. Duncan, *Journal of Geotechnical and Geoenvironmental Engineering*, Vol. 127, No. 8, pp. 700-702.

15. Duncan, J. M. (2000)

“Factors of Safety and Reliability in Geotechnical Engineering”, *Journal of Geotechnical and Geoenvironmental Engineering*, ASCE, Vol. 126, No. 4, pp. 307-316.

16. Duncan, J. M. and A. L. Buchignani (1973)

“Failure of Underwater Slope in San Francisco Bay”, *Journal of the Soil Mechanics and Foundations Division*, ASCE, Vol. 99, No. SM 9, pp. 687-703.

17. Duncan, J. M. and S. G. Wright (2005)

“Soil Strength and Slope Stability”, John Wiley and Sons, Inc., New Jersey, U.S.A., 297 pages.

18. Geotechnical Engineering Office, Hong Kong (2000)

“Preliminary Quantitative Risk Assessment of Earthquake-Induced Landslides at Man-Made Slopes in Hong Kong”, Geo Report No. 98, By H.N. Wong and K.K.S. Ho, Government Publication Centre, Hong Kong., 69 pages.

19. Harr, M.E. (1977)

“Mechanics of Particulate Matter – A probabilistic Approach”, McGraw-Hill Inc., New York, U.S.A., 543 pages.

20. Harr, M.E. (1987)

“Reliability– Based Design in Civil Engineering”, McGraw-Hill Inc., New York, U.S.A., 290 pages.

21. Harrison, J.P. and J.A. Hudson (2000)

“Engineering Rock Mechanics; Part 2: Illustrative Worked Examples” Pergamon, An Imprint of Elsevier Science, Oxford, United Kingdom, 506 pages.

20. Hasofer, A.M. and N.C. Lind (1974)

“Exact and Invariant Second-Moment Code Format”, Journal of the Engineering Mechanics Division, ASCE, Vol. 100, No. EM 1, pp. 111-121.

21. Hoek, E. and J. Bray (1981)

“Rock Slope Engineering: Revised Third Edition”, The Institution of Mining and Metallurgy, London, United Kingdom. 358 pages.

22. Hudson, J.A and J.P. Harrison (1997)

“Engineering Rock Mechanics; An Introduction to the Principles” Pergamon, An Imprint of Elsevier Science, Oxford, United Kingdom, 444 pages.

23. Hutchinson, J.N. (1968)

“Mass Movement”, in Encyclopedia of Geomorphology, R.W. Fairbridge (Editor), Reinhold Book Corporation, New York, U.S.A., pp. 688-696.

24. Khalokakaie, R. (1999)

“Computer-Aided Optimal Open Pit Design with Variable Slope Angles”, Ph. D. Dissertation, University of Leeds, United Kingdom, 300 pages.

25. Knezevic, J. (1993)

“Reliability, Maintainability and Supportability: A Probabilistic Approach”, McGraw-Hill International (U.K.) Limited, London, United Kingdom. With the Software Package, 291 pages.

26. Komljenovic D. (2008)

“Development of Risk-Informed, Performance-Base Asset Management in Mining”, International Journal of Mining, Reclamation and Environment, Taylor & Francis Group, Vol. 22, No. 2, pp. 146-153.

27. Kulhawy, F.H. (1992)

“On the Evaluation of Soil Properties”, Geotechnical Special Publication No. 31, ASCE, Reston, Virginia, U.S.A., pp. 95-115.

28. Lacasse, S. and F. Nadim (1997)

“Uncertainties in Characterizing Soil Properties”, Publication No. 21, Norwegian Geotechnical Institute, Oslo, Norway., pp. 49-75.

29. Lambe, T.W. and R.V. Whitman (1979)

“Soil Mechanics, S.I. Version”, John Wiley and Sons Inc., New York, U.S.A., 553 pages.

30. Lee, I. K., W. White, O.G. Ingles (1983)

“Geotechnical Engineering”, Pitman Publishing Inc., Boston, Massachusetts, U.S.A., 508 pages.

31. Li, K.S. and P. Lumb (1987)

“Probabilistic Design of Slopes”, Canadian Geotechnical Journal, Vol. 24, No. 4, pp. 520-535.

32. Liu, C. and J.B. Evett (1998)

“Soils and Foundations: Fourth Edition”, Prentice Hall Inc., New Jersey, U.S.A., 504 pages.

33. Mostyn, G.R. and K.S. Li (1993)

“Probabilistic Slope Analysis-State-of-Play”, Proceedings of the Conference on Probabilistic Methods in Geotechnical Engineering, A.A. Balkema, The Netherlands, pp. 89-109.

34. Obert, L. and W. I. Duvall (1976)

“Rock Mechanics and the Design of Structures in Rock”, John Wiley and Sons Inc., New York, U.S.A., 650 pages.

35. Rosenblueth, E. (1975)

“Point Estimates for Probability Moments” Proceedings of the National Academy of Science, U.S.A., Vol. 72, No. 10, pp. 3812-3814.

36. Singh, V.P., S.K. Jain, A. Tyagi (2007)

“Risk and Reliability Analysis: A Handbook for Civil and Environmental Engineers”, ASCE Press, Reston, Virginia, U.S.A., 785 pages.

37. U.S. Army Corps of Engineers (1970)

“Engineering and Design: Stability of Earth and Rock-Filled Dams”, Engineering Manual No. 1110-2-1902, Department of the Army, Corps of Engineers, Office the Chief of Engineers, Washington, D.C., U.S.A.

38. U.S. Army Corps of Engineers (1998)

“Risk-Based Analysis in Geotechnical Engineering for Support of Planning Studies”, Engineering Circular No. 1110-2-554, Department of the Army, Corps of Engineers, Office the Chief of Engineers, Washington, D.C., U.S.A.

39. U.S. Bureau of Mines (1991)

“Rotational Fracture Mechanisms Using Multiple Friction Circles for Stability Analysis”, By D.A. Crum, USBM Report of Investigations No. 9352, U.S. Department of the Interior, Washington D.C., U.S.A., 50 pages.

40. U.S. Bureau of Reclamation (2001)

“Engineering Geology Field Manual: Second Edition”, U.S. Department of the Interior, Washington D.C., U.S.A., Vol. I – 472 pages, Vol. II – 535 pages.

41. Vose, D. (2005)

“Risk Analysis: A Quantitative Guide: Second Edition (Fifth Reprinted)”, John Wiley & Sons Ltd., Chichester, United Kingdom., 418 pages.

42. Whitman, R. V. (1984)

“Evaluating Calculated Risk in Geotechnical Engineering”, Journal of Geotechnical Engineering Division, ASCE, Vol. 110, No. GT2, pp. 145-188.

43. Whitman, R. V. (2000)

“Organizing and Evaluating Uncertainty in Geotechnical Engineering”, Journal of Geotechnical and Geoenvironmental Engineering, ASCE, Vol. 126, No. GT 7, pp. 470-475.

44. Wolff, T.F. (1994)

“Evaluating the Reliability of Existing Levees” Report on Research Project: Reliability of Existing Levees, Prepared for U.S. Army Corps of Engineers, Waterways Experiment Station Geotechnical Laboratory, Vicksburg, MS., U.S.A.

45. Wolff, T.F. (1996)

“Probabilistic Slope Stability in Theory and Practice” Geotechnical Special Publication No. 58, ASCE, Reston, Virginia, U.S.A., pp. 419-433.

46. Wyllie, D.C. and C.W. Mah (2004)

“Rock Slope Engineering, Civil and Mining: 4<sup>th</sup> Edition”, Spon Press, Taylor & Francis Group, London and New York, 431 pages.

47. Yucemen, M.S. (1973)

“A Probabilistic Study of Safety and Design of Earth Slopes”, Ph. D. Dissertation, University of Illinois at Urbana-Champaign, Illinois, U.S.A., 205 pages.
