### ABSTRACT

The research objectives were to evaluate school management standard in the education extension primary schools ; to identify problems according to the practice of the schools ; and to compile some suggestions for promoting the set standard. The sampling included 354 subjects, composed of 66 principals and 288 teachers by using 4 sets of the questionnaire for collecting data which were then analyzed by computer (SPSS/PC<sup>+</sup> program) for calculating percentage, means, and standard deviations.

### The Results

It was found that (1) The education extension primary schools of Phanomroong Region, Burirum, carried on the standards in general and its parts "much" in organizing multi activities for promoting learning-teaching, supporting the personnel to try most in developing teaching and co-ordinating all concerned partnership for school development. However, there was moderate" practice in work practice system evaluation; (2) There was "moderate" problems in carrying on the set standard practice both in general and its parts, except the use of plan for promoting management efficiently ; (3) The proposed guidelines for promoting the standard practice were accepted "much" especially the teachers should be assigned to conduct according to their ability and aptitude.
