

Supattra Kanjanalaor 2012: Factors Affecting to Roles in Dengue Fever Prevention of Public Health Volunteers, Pak Kret District, Nonthaburi Province. Master of Arts (Social Development), Major Field: Social Development, Faculty of Social Sciences. Thesis Advisor: Mr. Wirote Manopimoke, Ph.D. 145 pages.

The main objective of this research is to study the role of health volunteers in the prevention of dengue fever. Pak Kret, Nonthaburi Province. The sample of 327 health volunteers were sampled with the system. Data collection using interviews. Test the reliability of the tool by using the coefficient alpha of Ron Bach. Statistics are statistics used to analyze data using descriptive statistics, hypothesis testing, correlation coefficient and the Pearson chi-square statistically significant at the 0.05 level.

The results show that knowledge level about dengue prevention of health volunteers is high. However, the training should be added to provide an accurate reconstruction of the village health volunteers to be knowledgeable and implemented correctly.

The awareness level in dengue prevention of health volunteers is high. However, the volunteers, most of the volunteers do not realize the severity of the disease. This will make them do not realize the severity of epidemic. So it will affect to the community.

Attitudes level in the prevention of dengue in the overall health of the volunteers is high. However, some volunteers expect that the protection of the diseases is mission of public health officials. So we should have the right knowledge to the village health volunteers to be knowledgeable and implemented correctly.

Role of health of the volunteers in the prevention of dengue is high. However, the coordination and participation must be educated to health volunteers.

In summary, this study demonstrates the overall level of knowledge, attitudes and perceptions play a role in the prevention of dengue overall health volunteers is high. The problems in the operation can be applied in the review of the health volunteers. Training, knowledge, and the prevention of dengue in the region to achieve the next goal.
