At the currently circumstance, everyone is faced with getting worse economic system, political crisis and pollution. Moreover, population is vising every minute, which impacts people's life style and makes it unbalanced, inconsequence, everybody must struggle and try to do everything for taking property, fulfilling their greed, and getting esteem from other people. We always see fake behavior, for instance, a man is well - behaved, in fact, he is a furious man or a man uses sweet words, but he has aggressive mind.

All of these things show people's behavior, which is opposite from their subconscious, and it affects others and I. Therefore, I would like to present my attitude by using visual art to create painting.
