ABSTRACT

The purpose of this study were to develop the student's achievement and the student's skills towards inhanding student's learning.

Action research procedure through a case study was applied to this study. The subjects were 10 prathomsuksa VI students who studied in the first semester of the academic year 1999 at Kapee school in Nonghan district, Udonthaneo province. Three types of research instruments were used in the study. 1) The experimental tool included 18 lesson plans using mainly local community resources of knowledge. 2) The evaluation apparatus to assess the efficiency of the teaching included learning achievement test and group working skill scales. 3) The feedback

apparatus. These instruments included an observation form for keeping a record of the teacher's teaching behavior, an observation form for keeping a record of the student's studying behavior, a form to record the student's expression of opinion, teacher's diary and a form to record the student's interview.

The result of study were as follow .

1. The student learned in the Life - Experience Group on unit If : Life in home : by using Local Community Resources of knowledge Over 80 % of the students passed the expected achievement criterion of 75 %

2. Most of students of the study had developed good criterion skills of inhande'd's learning.
