

## บรรณานุกรม

- สมณฑา วัฒนสินธุ์. (2545). จุลชีววิทยาทางอาหาร. ภาควิชาวิทยาศาสตร์และเทคโนโลยีการอาหาร คณะวิทยาศาสตร์ มหาวิทยาลัยธรรมศาสตร์. กรุงเทพฯ. 454 หน้า.
- Abouseoud, M., Maachi, R., Amrane, A., Boudergua, S., and Nabi, A. (2008). Evaluation of different carbon and nitrogen sources in production of biosurfactant by *Pseudomonas fluorescens*. *Desalination*. 223: 143-151.
- Al-Arajil, L., Rahman, R.N.Z.R.A., Basri, M., and Salleh, A.B. (2007). Microbial Surfactant. *AsPac J. Mol. Biol. Biotechnol*. 15: 99-105.
- Benincasa, M., Abalos, A., Oliveira, I., and Manresa, A. (2004). Chemical structure, surface properties and biological activities of the biosurfactant produced by *Pseudomonas aeruginosa* LBI from soapstock. *Antonie van Leeuwenhoek*. 85: 1-8.
- Bordoloi, N.K., and Konwar, B.K. (2008). Microbial surfactant-enhanced mineral oil recovery under laboratory conditions. *Colloids and Surfaces B: Biointerfaces*. 63: 73-82.
- Blando, F., Gerardi, C., and Nicoletti, I. (2004). Sour cherry (*Prunus cerasus* L.) anthocyanins as ingredients for functional foods. *Journal of Biomedicine and Biotechnology*. 5: 253-258.
- Bylka, W., Matlawska, I., and Pilewski, N.A. (2004). Natural flavonoids as antimicrobial agent. *Journal of the American Naturaceutical Association*. 7: 24-31.
- Cassidy, D.P., and Hudak, A. J. (2001). Microorganism selection and biosurfactant production in a continuously and periodically operated bioslurry reactor. *Journal of Hazardous Materials*. 84: 253-264.
- Chen, S-C., and Chung, K-T. (2000). Mutagenicity and antimutagenicity studies of tannic acid and its related compounds. *Food and Chemical Toxicology*. 38: 1-5.
- Chrzanowski, G., Sempruch, C., and Sprawka, L. (2007). Investigation of phenolic acids in leaves of blackcurrant (*Ribes nigrum* L.) and sour cherry (*Prunus cerasus* L.) [On-line]. Available: <http://www.ejpau.media.pl/volume10/issue4/art-42.htm>

- Das, P., Mukherjee, S., and Sen, R. (2008). Antimicrobial potential of a lipopeptide biosurfactant derived from a marine *Bacillus circulans*. *Journal of Applied Microbiology*. 104: 1675-1684.
- Deleu, M., and Paquot, M. (2004). From renewable vegetables resources to microorganisms : new trends in surfactants. *C. R. Chimie*. 7: 641-646.
- Edwards, K.R., Lepo, J. E., and Lewis, M. A. (2003). Toxicity comparison of biosurfactants and synthetic surfactants used in oil spill remediation to two estuarine species. *Marine Pollution Bulletin*. 46: 1309-1316.
- Healy, M.G., Devine, C.M., and Murphy, R. (1996). Microbial production of biosurfactants. *Resources, Conservation and Recycling*. 18: 41-57.
- Hsien, Chung Liao., and Shih, Jen Jiang U., (1999). Determination of cadmium, mercury and lead in coal fly ash by slurry sampling electrothermal vaporization inductively coupled plasma mass spectrometry. *Spectrochimica Acta Part B*. 54: 1233-1242.
- Jayabalan, R., Marimuthu, S., and Swaminathan, K. (2007). Changes in content of organic acids and tea polyphenols during kombucha tea fermentation. *Food Chemistry*. 102: 392-398
- Joshi, S., Bharucha, C., and Desai, A.J. (2008). Production of biosurfactant and antifungal compound by fermented food isolate *Bacillus subtilis* 20B. *Bioresource Technology*. 99: 4603-4608.
- Kim, D-O., Heo, H.J., Kim, Y.J., Yang, H.S., and Lee, C.Y. (2005). Sweet and sour cherry phenolics and their protective effects on neuronal cells. *J. Agric. Food Chem*. 53: 9921-9927.
- Luc, J, Martin., and Chantal, Matar. (2005). Increase of antioxidant capacity of the lowbush blueberry (*Vaccinium angustifolium*) during fermentation by a novel bacterium from the fruit microflora. *Journal of the Science of Food and Agriculture*. 85: 1477-1484.
- Masen, T., et al. (2001). Environmental and health assessment of substances in household detergents and cosmetic detergent product [On-line]. Available:[http://www.greengatemarket.com/Danish\\_EPA\\_Project\\_615.pdf](http://www.greengatemarket.com/Danish_EPA_Project_615.pdf)

- Monteiro, S. A., et al. (2007). Molecular and structural characterization of the biosurfactant produced by *Pseudomonas aeruginosa* DAUPE 614. *Chemistry and Physics of Lipids*. 147: 1-13.
- Mulligan, C.N. (2005). Environmental applications for biosurfactants. *Environmental Pollution*. 133: 183-198
- Nadarajah, N., Singh, A., and Ward, O.P. (2002). Evaluation of a mixed bacterial culture for de-emulsification of water-in-petroleum oil emulsions. *World Journal of Microbiology & Biotechnology*. 18: 435-440.
