

The purposes of this research were to study and to compare the state and problems in operating The Amateur Softball Association of Thailand as perceived by the administration committee, coaches and the national softball athletes from 1993-1996 A.D. The 10 questionnaires were sent to the Administration committee such as Vice President, Vice Secretary General, Treasurer, Public Relations, Registrar Technical Section, Competition Organizing section, Receptionist and Central Committee, and 10 or 100 percent were returned, 26 questionnaires were sent to administration committee, and 22 or 84.61 percent were returned, 10 questionnaires were sent to coaches and 10 or 100 percent were returned and 130 questionnaires were sent to national softball athletes and 113 or 86.92 were returned. The total questionnaires were 166 papers and 145 questionnaires or 89.34 percent were returned. The data were then analyzed in terms of percentages means and standard deviations. One-Way ANOVA was used to test the significant differences. The Scheffe' method also employed to test the significant differences between means.

The findings were as follows:

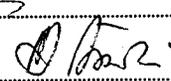

1. The whole proceeding state of The Amateur Softball Association of Thailand was at the fair level and each area of planning, organizing, staff organizing, budgeting, location and material, and co-ordinating, except the directing and reporting areas was at the good level.
2. The whole problems of The Amateur Softball Association of Thailand were at the high level and each area of planning, staff organizing, budgeting, location and material, directing, co-ordinating and reporting except organization area was at the low level.
3. The whole proceeding state of The Amateur Softball Association of Thailand as perceived by the administration committee, coaches and national softball athletes were significantly different at the .05 level. These areas were planning organizing, staff organization, budgeting, directing, co-ordinating and reporting whereas the location and material area was not significantly different at the .05 level.
4. The whole proceeding problems of The Amateur Softball Association of Thailand as perceived by the administration committee, coach and national softball athletes were significantly different at .05 level. These areas were planning organizing, directing, co-ordinating reporting, whereas the areas of staff organization, budgeting and location and material were not significantly different at the .05 level.
