PRITSANA NOIJAIDEE : STATE AND PROBLEMS OF THE MANAGEMENT OF
INFORMATION SYSTEM IN THE PROVINCIAL GENERAL EDUCATION OFFICES,
EDUCATIONAL REGION SEVEN. THESIS ADVISOR : ASSO.PROF,
NATNIPA KOOPARAT, Ph.D. 179 pp. ISBN 974-583-516-1

The purpose of this study was to identify state and problems of the management of information system in the provincial general education offices, educational region seven. The study was divided into 6 parts according to Murdick with Munson's stages of the management of information system, namely, 1) information needs analysis, 2) setting system objectives, 3) establishing the operational organization, 4) structuring the information system, 5) system implementation, and 6) evaluation.

It was found that the provincial general education offices had properly organized the following : determining users' information needs, objective implementation, data classification, determining information qualifications, constructing forms, specifying the information retention period, informing the system operation to all personnel, monitoring the system, and system maintainance. While the areas that needed to be provided or improved included the following: establishing the operational organization, appointing the operational committee, assigning personnel to response the operation, allocating budgets, performing to meet the operational schedule, constructing the information flow chart, preparing knowledge of information system for personnel involving the system management, providing materials, equipment and facilities, appointing the evaluation committee, and the method of evaluation.
