KEY WORD: LABORERS / CONDITION / HOUSING

CHACKPOP Khabthong : EXISTING HOUSING CONDITION FOR LABOUR  
IN THE ELECTRICITY AND ELECTRONIC APPLIANCE FACTORY :  
CASE STUDY NAVANAKORN INDUSTRIAL ESTATE. THESIS ADVISOR :  
ASSO. PROF. MANOP BONGSADADT, 132 pp. ISBN 974-636-110-4.

This kind of research has some purposes for studying about life style, including with economical and social condition. An existing housing condition problem of some workers who produce the electricity and electronic appliance and about the employers with their ideas to provide existing housing for their employers. The research was divided for 2 groups of case study : a group of 332 labours who earn 3,370 baht up per month and a group of 50 enterprises.

From the research, it was found that the majority of enterprises didn't provide existing housings for their labours. But the majority of the labours are stayed at home for rents which were owned by private sector. The houses were built to the attached with each others. The walls were built from 2-3 levels bricks blocks. The room size are in an average 12 square meters, suitable for 2 persons. The workers are feel pretty appreciate in their houses. The problem they have is the high rent value that have to be spent more than other expenses.

An expense account for existing housing was provided for labours will be responded for their need and can give profit to many parts of whom who concern. So it was recommended to provided expense account for existing housing that the employers should cooperate with each others or invest with land developer agent group to build an existing housing for the labours could rent in lower value.
