ABSTRACT

The purposes of this research were to study 1) the current situation of the vocational organization, 2) main activities and their projects, 3) the operation of the administrative committee, the executive committee, and the counsellors according to their roles. 4) the problems in the operation of the vocational organization, 5) suggestion for the vocational organization development.

The population consisted of 15 industrial and community education colleges in the northeast. A set of questionnaire was employed to collect data. The earned data were analyzed by a programmed computer to acquire percentage, means and standard deviation.

Findings :

1) About the current situation of the vocational organization, it was found

that, there were temporary department, having suitable management of physical environmental both inside and outside the organization, having the organization symbol but insufficiency materials and having no entertaining room for members.

2) About the main activities and their projects, it was found that there were fully operation of 12 main activities and various projects for those main activities.

3) The work performance of the vocational organization was at the "much" level, in all 5 partial vision.

4) The overall problems in the operation of the vocational organization were at the "much" level, whereas the most obvious issues were budget and personal management.

5) There were some suggestions for the vocational organization development such as 1) there should be inservice training for the members, 2) there should be having the organization main activities plan, 3) there should be inservice training for the committees concerning rules and regulations of money spent on the activity affairs, 4) there should be having clearly time schedule of the activities.
