ABSTRACT

The purpose of this research was to study the secondary school students' need in teaching and learning on the course "Thong Thin Khong Rao 1" in secondary schools in Loei Province under the Department of General Education, Ministry of Education. Data were collected through a questionnaire distributed to a sample of 327 secondary school students. Percent, mean, standard deviation were used to study the characteristic of the data; and using the

computer programme-SPSS/PC+ subprogramme ANOVA and post hoc sheffe' method for analyzing the Data.

The results indicated that students' need in teaching and learning on the course " Thong Thin Khong Rao 1 " in secondary schools under the Department of General Education in Loei Province had high significances in every categories (the objectives, the contents, teaching and learning technique, instructional medias and Evaluation). Moreover, the study revealed that the students in the special big size schools had the significant different needs ($p < .05$) from the students in the big size schools, the medium size schools and the small size school in teaching and learning on the course " Thong Thin Khong Rao 1 " in every categories. For instance, objective, content, teaching and learning technique, Instructional media, and evaluation.
