The purpose of this research was to study the academic administrators', academic committees' and teachers' opinions towards academic administration and related problems in Tepleela School. The sampling group was composed of 100 persons from those aforementioned groups.

### **Research Results:**

1. Opinions of academic administrators, academic committees and teacherstowards academic administration were not different. Their performance was at high level.

2. Opinions of academic administrators, academic committees and teachers towars related problems were not different. Problems they were encountering were at moderate level.

3. Administrators at different positions had no different opinions towards academic administration; but they differently opined about related problems

4. Academic committees with different experiences had different Opinions towards academic administration; but they had no different opinions towards related problems.

5. Teachers with varied experiences had no different opinions towards both academic administration and related problems
