The main objective of this research is to study the relationship between the development of government officials and organizational effectiveness. A sample of 150 officials used in the study was selected from the Office of the Private Education Commission

The research findings are as follows ;

1. Most of the sample (more than 50%) have been developed in many aspects, i.e. training, supervision, the delegation of more responsible and important job, and higher education.
2. Most of the sample (more than 50%) have the positive attitude towards the environment of the organization.

3. There is no significant relationship between the attitude towards the importance of the official development and the observed development.

4. There is significant relationship between the attitude towards the environment of the organization and the organizational effectiveness.

5. There is significant relationship between the organizational effectiveness and the official development in some aspects, i.e. training and supervision.
