2. Assoc. Prof. Rattana Hengsawad

The purposes of this research were to study and compare the desirable characteristics of a headcoach for the volleyball team as perceived by administrators, coaches and athletes. A questionnaire designed by the researcher was used to collect the data from a sample of 19 administrators, 14 coaches and 84 athletes. All of the 117 questionnaires (100%) were completed and returned. These data so obtained were analyzed by SPSS/PC+ using percentage, mean, standard deviation and one-way analysis of Variance together with Scheme's method at the .05 level of significance

The results were as follows:

- 1) The opinions of the administrators, coaches and athletes concurring the desired characteristics of the volleyball head coach in all five aspects, were at a high level.
- 2) In general no statistically significant difference was found among the administrators, coaches and athletes in Thais opinions concerning the desirable

characteristics of the volleyball training , except ,on the sports science whereby  
significant difference was found between the administrators and coaches and between  
the coaches and athletes
