3. Assoc. Prof. Sorn Bangyeekhan

This thesis's objectives aims at the study of the general aspects of the policy and the development plan of the City Municipality of Ayuddaya, emphasizing on the Infar-structure and the fundamental service system. It is also to evaluate the operation and the effectiveness of the policy in association with The 1999 People's Development Plan of the City Municipality of Ayuddaya by comparing the result of the evaluation of the operation and the effectiveness of the development plan of the City Municipality of Ayuddaya given by the population of different occupations, education and ages via the use of the documentary research and the survey research methods.

The outcome of the research reveals that the operation and the effectiveness on the services of every project given by the City Municipality of Ayuddaya concerning the home water supply service project, pre-arrangement of the traffic signs and

reparing the traffic lights, the watermain deployment, the road construction, the drainage system, and the bridge construction are in the fair or medium level evaluated by most selected sample people.

According to the compared result of the operation and the effectiveness of the policy and the development plan, and the fundamental service system of the City Municipality of Ayuddaya, people of various occupations, and ages show different points of view significantly in statistic at the level of 0.05. In contrast, people of various education level show no different points of view significantly in statistic at the level of 0.05 as well.
