The purposes of this research were to construct the efficiency Instructional Package of Grammatical Pali Dharma Curriculum of level 1-2 and to compare the students' learning achievement between the students who learned by using the Instructional Package and those who learned by using the Traditional Method. The samples were 44 monks and novices from Pomwichien Chootikarama Temple Samutsakorn Province. They were selected by purposive sampling. The samples were randomly assigned into two groups: the experimental group and the control group. Each group was comprised of 22 students.

The instruments used in this research were constructed by the researcher. The achievement test has the reliability of 0.85 and the Instructional Package has the efficiency ratio of 95.55/82.59

The result of this research was that the monks and novices who learned by using the Instructional Package had significantly higher achievement than those who learned by the Traditional Method at .05 statistical level.
