

C843231 : MAJOR SOCIAL PSYCHOLOGY

KEY WORD: BELIEF IN A JUST WORLD / SUBJECTIVE WELL-BEING

SARINEE WISETSORN : THE RELATIONSHIP BETWEEN BELIEF IN A JUST WORLD AND
SUBJECTIVE WELL-BEING OF CHULALONGKORN UNIVERSITY SENIOR STUDENTS.

THESIS ADVISOR : ASSO. PROF. THEERAPORN UWANNO., Ph.D. 132 pp.

ISBN 974-638-044-3

The purpose of this research was to study the relationship between belief in a just world and subjective well-being and to compare the differences of the belief in a just world of Chulalongkorn University senior students. Instruments in this research were a three-dimension belief in a just world scale and a three-dimension subjective well-being scale.

Findings are as follows:

1. The personal dimension of the belief in a just world have significant positive linear correlations with subjective well-being in satisfaction with life, happiness, and positive affect dimensions ($p < .05$).
2. The interpersonal dimension of the belief in a just world have significant positive linear correlations with subjective well-being in satisfaction with life, happiness, and positive affect dimensions ($p < .01$, $.001$, and $.001$, respectively).
3. The socio-political dimension of the belief in a just world have significant positive linear correlations with subjective well-being in satisfaction with life, happiness, and positive affect dimensions ($p < .05$, $.05$, and $.01$, respectively).
4. The students who study in Sciences and Humanities do not differ from the students who study in Social Science in the three-dimension of the belief in a just world.
5. Male and female students do not differ in the three-dimension of the belief in a just world.
