The purpose of this research was to propose a program for the development of secondary school administrators under the jurisdiction of the department of general education. The procedures of the program development consists of 3 stages as follows:

1. Study the conditions and problems of the administrator development through the synthesis of data derieved from documentary analysis, top-ranked executive interviews, and school administrators enquiries.
2. Develop the administrator development program by the synthesis of thoughts, principles, and theories from documents, texts, articles, and research reports related to the data mentioned in the first stage.
3. Validate the appropriateness and the feasibility of the program by experts.

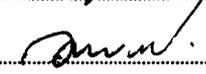

The research finding was a productive program consists of program significance, thoughts and principles, objectives, guides for development, and operational mechanisms with the 11 tentative guides for the administrator development of 1) identifying policies for the administrator development with in the general department, 2) specifying policies for the administrator development with in the educational region, 3) providing the development plans for the administrators, 4) conducting the needs assessment aimed for development planning, 5) establishing the monitoring, following up, and evaluating of the administrator's achievement, 6) founding academic centers for the administrator development, 7) authorizing the office of province general education to develop the administrators with in its area, 8) fund raising for the administrator development, 9) annually training the administrators, 10) annually conducting field trips for the administrators, and 11) organizing national symposium seminars every a couple of years
