ABSTRACT

The purpose of this research was to compare the school personnel and outsider's opinion concerning school and community relations in the secondary schools under the Jurisdiction of General Education Department, Khon Kaen Province. The purposes were : (1) to study working condition, problems, and the suggestions in school and community relations in the secondary schools under the Jurisdiction of General Education Department, Khon Kaen Province, (2) to compare working condition, problems, and the suggestions in working situation concerning school and community relations according to the school personnel and outsider's opinions.

The sample in this study included 83 secondary schools. The total of 332 informers consisted of (1) school personnel who were the school administrators, (2) the outsiders who were the President of Education Board and the Education Committee. A set of Questionnaire was used to collect data. Percentage, Arithmetic Mean and Standard Deviation and T-test were computed by using a computer program. The results of this research were as follows :

1) The overall working condition of school and community relations was in "Much" level concerning public relations, joining with community activity, giving service to community promoting of community and the other institutes relations, and community joining with school activity.

According to the comparison, there was significant difference between school personnel and outsider's opinion at the .05 concerning public relations, joining with school activity, and promoting of community and the other institutes relations. There was no significant difference in giving service to community at the .05 level.

2) The overall problem in working with community relations was in "Moderate" level concerning community joining with school activity, promoting of community and the other institutes relations, public relations, joining with community activity, and giving community service.

According to the comparison, there was no significant difference in the school personnel and outsider's opinion in all aspects at the .05 level.

3) The study suggestions as the guidelines of developing the working of community relations, it found out that the community service, community joining with school activity, promoting of community and the other institutes relations, public relations, and joining with community activity respectively.

According to the comparison, there was no significant difference between the school personnel and outsider's opinion toward the suggestions in every aspect at the .05 level.
