### ABSTRACT

The purposes of this research were to study the problems and suggestions for solving educational supervision problems of the Chiefs of District Primary Education in Buriram Province.

The sample consisted of 22 Chiefs of District Primary Education, 22 Assistant Chiefs of District Primary Education, 66 District Supervisors. A set of questionnaires was used to collect data, and analyzed by programmed computer (SPSS/PC<sup>+</sup>) to acquire percentage, arithmetic means and standard deviation.

**The findings were as follows :**

1. The problems of education supervision in every aspect of 7 tasks were found at medium level. The problems of the educational research were found at the high level.
2. The first five suggestions for solving educational supervision problems were to provide the in-service training for educational supervision knowledge of district supervisors, budget appropriation for educational supervision, the co-operative planning of educational supervision among supervisors, the innovation of educational technology such as the computer usage and the co-operative seminar among supervisors for problems solving and suggestions.
