C 841889 : MAJOR HEALTH EDUCATION

KEY WORD: MENTAL HEALTH / SCHOOL BASED MENTAL HEALTH SERVICES / NEEDS / STUDENTS IN SECONDARY SCHOOL.

CHOMPUNUCH NOONOI : A STUDY OF MENTAL HEALTH AND NEEDS FOR SCHOOLS BASED MENTAL HEALTH SERVICES OF STUDENTS IN SECONDARY SCHOOLS UNDER THE JURISDICTION OF THE DEPARTMENT OF GENERAL EDUCATION, BANGKOK METROPOLIS. THESIS ADVISOR : ASST. PROF. AIMUTCHA WATTANABURANON, Ed.D., 171 pp. ISBN 974-636-357-3

The purposes of this research were to study and to compare the mental health and needs for school based mental health services of students in secondary schools under the Jurisdiction of the Department of General Education, Bangkok Metropolis on variable of gender. The subjects were 500 mathayom sukka four to mathayom sukka six students, they were 244 males and 256 females from 82 schools. The Symptom Check List (SCL-90) and the questionnaires concerning school based mental health services needs were also used. All questionnaires (accounted for 100 percent) were returned. The data were then analyzed to obtain percentages, means and standard deviations. A t-test method was also applied to determine the statistically significant differences at the .05 level.

The results were as follows:

1. The mental health of all students was at the normal level in the areas of somatization, obsessive-compulsive, interpersonal sensitivity, depression anxiety, hostility, phobic anxiety, paranoid ideation and psychoticism.
2. The mental health of most male and female students had no statistically significant differences at the .05 level except in the areas of phobic anxiety and psychoticism. Female students had more phobic anxiety for no reason than males and males had greater psychological symptoms than females.
3. The needs for school based mental health services of students were at the high level in the areas of prevention of mental health problems, mental health promotion, and treatment and mental health care.
4. There were no statistically significant differences at the .05 level between male and female students' needs for school based mental health services.
