ABSTRACT

The purposes of this study were to construct the Buddhist training plan : to study the Brahmavihara IV virtue reasoning of Mathayomsuksa VI student after plan implementation. The samples of the study were 45 students of Kaen Nakorn Witthayalai School whom were selected by means of the purposive sampling method. The Pre-test and Post-test were given to the experimental group of students before and after the experiment respectively.

The result of this study revealed that there was a significant difference of the arithmetic means at the level of .01 in the Brahmavihara IV virtue reasoning ; the arithmetic means of the post-test was higher than the pre-test. This showed that the Buddhist training plan had affected to Brahmavihara IV virtue reasoning of Mathayomsuksa VI students in a superior way.
