KEY WORD: TIME ALLOCATION / STUDENT

THITTIMA SUPHAPUCK : TIME ALLOCATION OF MATHAYOM SUKSA THREE STUDENTS IN BANGKOK METROPOLIS. THESIS ADVISOR : ASST. PROF. SUVATHANA VIBULSRESTH, Ph.D. 245 pp. ISBN 974-635-399-3

The purpose of this study is to investigate the relationship between demographic, economic and social factors and time allocation of mathayom suksa three students in Bangkok. A multi-stage sampling technique was used in selecting students from schools under the General Education Department, the Ministry of Education. Eight hundred and twenty eight students were selected to answer the questionnaires. The chi-square test was used in testing the validity of hypothesis.

Time allocation of students was divided into academic, household and recreational activities. The research results showed firstly that economic and social factors such as family income, fathers' and mothers' education and students' educational achievement have statistically significant effect on academic activities from Monday to Sunday.

Secondly, it was found that sex, mothers' occupation, family income, fathers' and mothers' education and educational achievement have statistically significant effect on household activities from Monday to Sunday. However, fathers' occupation correlated with household activities only on weekend.

Thirdly, this analysis showed that only sex and educational achievement have a statistically significant impact on recreational activities from Monday to Sunday. But birth order of the students correlated with recreational activities only from Monday to Friday.
