ISBN 974-634-815-4

The study on the local influentials and elections intends to find out why these influential people fail to use their power in the 1992 general elections at the locality named. It is found out that main reasons of the failure result from the fact that economic, social and political changes that have been going on cause that failure, plus control mechanism coming from the government. Although it is also found out that local people have somewhat developed their idea about the elections, that development may be caused by some other factors that are not covered in this thesis.
