

## C644209 : MAJOR NON - FORMAL EDUCATION

KEY WORD : DATA / INFORMATION / NEED OF USING INFORMATION / LEVEL OF USING INFORMATION

WANTIP KUKUMSAI : A STUDY OF THE LEVEL OF USAGE OF ESSENTIAL INFORMATION IN THE ORGANIZATION OF NON - FORMAL EDUCATION ACTIVITIES OF DISTRICT NON - FORMAL EDUCATION SERVICE CENTERS.

THESIS ADVISOR : ASST.PROF. ARCHANYA RATANA-UBOL, Ed.D. 139 pp. ISBN 974-635-071-4

The purposes of this study were : to study the level of essential information usage in the organization of non - formal education activities of District Non - Formal Education Service Centers in nine areas according to the status of head officers of District Non - Formal Education Service Centers which were years of work and the experiences of using information ; and to propose the order of important data and information of District Non - Formal Education Service Centers.

Subjects of this study were 286 head officers of District Non - Formal Education Service Centers who worked during the year of 1995. The researcher developed survey questionnaires as the instrument for collecting data. Questionnaires were mailed to the subjects, and the data were analyzed by percentage, arithmetic mean, standard deviation and the t - test.

The results indicated that head officers' needs of eight areas of information were at the high level, only one area was at the middle level. Also, the head officers' levels of usage information were high level in seven areas and two areas were at the middle.

The researcher compared the level of essential information usage in the organization of non - formal education activities according to head officers' years of work and found that there was no significant difference in all areas. In contrast, there were statistically differences at .05 level in all areas among different head officers' experiences of using information when the researcher compared the needs of using information. Also, in the aspect of the level of using information, there were statistically significant differences at .05 level in seven areas. Except for the aspects of material and building, the result showed that there was no statistically significant difference.

There were 78 lists which should be kept in each areas of data and information of Non - Formal Education Activities for the order of important data and information.
