The purpose of this research was to study the state and problems of the implementation of drug prevention policy in public secondary schools, Changwat Phra Nakhon Si Ayutthaya.

The state of the implementation summarized from the interview results with highest frequencies revealed that :

1. Department of General Education developed policies and measures for drug prevention and informed schools to implement them. Schools did not appoint drug prevention committee but they used to survey data of students who used drugs. Students learned to recognize danger of drugs through exhibitions, information boards. School administrators informed teachers to take care of drug prevention, conducted follow-up of teachers from written or verbal reports. Data on students who used drugs were reported by schools. Ayutthaya General Education Office monitored and controlled schools in putting drug prevention policies into practice.

2. Problems specified by more than 50 percent of respondents were : Teachers lacked experience and knowledge concerning different kinds of drug ; Teachers and parents showed no attention and responsibility for children ; Drugs were widely spread in community. Community environment was harmful for teachers responsible for drug prevention.
