C640524 : MAJOR ELEMENTARY EDUCATION

KEY WORD: PERFORMANCE / BEGINNING TEACHERS / ELEMENTARY / SARABURI

ANUCHAT PENGGLUN : A STUDY OF BEGINNING TEACHERS' PERFORMANCE IN ELEMENTARY SCHOOLS UNDER THE JURISDICTION OF THE OFFICE OF SARABURI PROVINCIAL PRIMARY EDUCATION. THESIS ADVISOR : ASSOC. PROF. VORASUDA BUNYAVIROJ, 190 pp. ISBN 974-636-656-4

The purpose of this research was to study the beginning teachers' performance in elementary schools under the jurisdiction of the Office of Saraburi Provincial Education according to the determined characteristics of teaching career standard party, the secretary of teachers' council, comprised of teaching activity, teaching-supported activity, and others' activity, and operation's problem.

The research findings were 1) according to the instructional provision job, the average time spent by most of the beginning teachers in assigned instruction was 25 hours/week. Most of them were assigned to teach the subject which were their major in colleges of universities. The instructional work load that the most of them had were instructional preparation, finding and preparing instructional media, doing the classroom routine, checking students' work, remedial teaching, 2) according to the instructional facilitation job, most of the beginning teachers were assigned to take care of students' activities, lunch program, school hygiene, library, counseling, supplies, administrative works, finance, registration and evaluation, audiovisual services subsequently, and 3) according to the other related jobs, it was found that most of the beginning teachers were assigned to take care of the school co-op., evaluation, school services which were involved with other governmental sections, school meeting, students' rules and regulation and other related services such as school musical band subsequently. Their satisfactions in instructional provision and instructional facilitation were at the high level, and their satisfaction in other related jobs was at the low level.

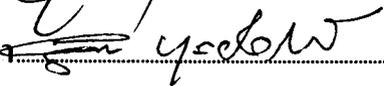

Moreover, most of the beginning teachers did not have problems in performing their jobs on instructional provision, instructional facilitation and other related jobs, as well as having no problems in performing in school. However, it was found that most of the beginning teachers wanted to move back to teach in their home town.
