The purposes of this research were to study 1) Thai language teaching organization 2) operation in the aspects of student activities, guidance, administrative work and development work 3) qualitative operation Thai language teachers in school under the jurisdiction of the office of the Pattani provincial primary education.

Finding : Instructional preparation, outstanding Thai language teachers prepared instructions in advance regularly. Instructional activity organization, they taught and concentrated on students by using CLE methodology which will emphasize on repeat and revise especially for Malayu spoken students. Instructional media utilization, they manufactured media by themselves and frequently used word card, picture card, sentence of stripe and real things. Classroom position organization, they organized experienced-corners. Measurement and evaluation, most of them used observation, interrogation, performing exercises and learning objective exercises. Extra-curricular activities, most of them organized Thai language competition activities. Remedial teaching, they instructed relatively to the problems found from measurement and evaluation. Curriculum and curriculum improvement, they improved lessons by suitable state of locality and unopposed to Islamism principles.

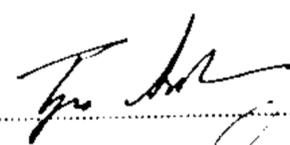

Opearation and other aspects of operation were found that besides their ordinary instructions they were also responsible in other aspects of operation. Students activities, they and other teachers in school collaborated. Guidance, they advised students to attend Thai language study. Administrative work, they performed in classroom. Development work, they studied by themselves from texts, traiping and talked to experts.

In addition, qualitative operation in the aspects of moral of outstanding Thai language teachers by teachers and administrators' opinion were found that the diligence about eagerness operation and operation was always in full ability. Economization in knowing how to save money for position firmness was in the highest level. Friendliness, justice, responsibility, discipline, patience, good attitude toward their occupation and democratic operation and support life were in high level.
