

LIST OF TABLES

TABLE		PAGE
4.1	Surface area, porosity, average particle size and percent yield of CeO ₂ prepared by different methods	34
4.2	Surface area, porosity, average particle size and percent yield of CeO ₂ prepared by different cerium sources	38
4.3	Surface area, porosity, average particle size and percent yield of CeO ₂ prepared by different surfactants	41
4.4	Total pore volume, surface area and average pore diameter of CeO ₂ prepared by CEAs method at different calcinations temperature	42
4.5	Surface area, porosity, average particle size and percent yield of CeO ₂ prepared by CEAs at different water content	44
5.1	Surface area, porosity, average particle size and percent yield of CeO ₂ and Ni/CeO ₂ prepared by different methods of CEAs	50
5.2	The result of all catalyst after methane steam reforming	53
5.3	The results after methane steam reforming at 900°C	54
A.1	The size distribution of CeO ₂ prepared by RM method	69
A.2	The size distribution of CeO ₂ prepared by ELM method	69
A.3	The size distribution of CeO ₂ prepared by CEAs method	69
A.4	The size distribution of CeO ₂ particles prepared by CEAs method : (NH ₄) ₃ Ce(NO ₃) ₂ as a cerium source	71
A.5	The size distribution of CeO ₂ particles prepared by CEAs method : Ce(NO ₃) ₃ ·6H ₂ O as a cerium source	71

A.6	The size distribution of CeO ₂ particles prepared by CEAs method : CeCl ₃ ·7H ₂ O as a cerium source	71
A.7	The size distribution of CeO ₂ particles prepared by CEAs method : PE4LE as a surfactant	73
A.8	The size distribution of CeO ₂ particles prepared by CEAs method : Brij52 as a surfactant	73
A.9	The size distribution of CeO ₂ particles prepared by CEAs method : Brij96V as a surfactant	73
A.10	The size distribution of CeO ₂ particles prepared by CEAs method : AOT as a surfactant	74
A.11	The size distribution of CeO ₂ particles prepared by CEAs method : CTAB as a surfactant	74
A.12	The size distribution of CeO ₂ particles prepared by CEAs method : calcined at 500°C	76
A.13	The size distribution of CeO ₂ particles prepared by CEAs method : calcined at 600°C	76
A.14	The size distribution of CeO ₂ particles prepared by CEAs method : calcined at 800°C	76
