

MR.KRITSANA PIPATUPATHUM : DEVELOPMENT OF MANAGEMENT
INFORMATION SYSTEM FOR GENERAL
BUSINESS

THESIS ADVISOR : ASST. PROF. MANDHANA PRAKANSAMUT

ISBN 974-584-386-5

Information system is the organization's important resource which helps in both decision - making and solving problems. It also assists the management in making business plans, capacity increase and cost reduction. However, to get the correct and up-to-date information, data have to be gathered from many various sources.

The analyst has developed the information system for managing a savings cooperative of a private enterprise. The analysis includes a study of the whole savings cooperative system ranging from depositing, withdrawing, share-holding, borrowing, guaranteeing, data collecting to operational procedures. Having all these data, a software program has been made in top-down design on AS/400 computer in RPG/400 language.

The analysis result shows that the savings system once computerized has successfully provided the coop officers with greater convenience and time-saving in dealing with their routine works. Information can be promptly retrieved and passbook updating can also be printed out immediately. The operation program.
