This research was to designed to assess primary school administrators training needs for annual operation planning in elementary schools under the jurisdiction of the office of Udonthani Provincial Primary Education.

Research Findings :

Each group of administrators expressed their knowledge and understanding for annual operation planning at moderate level.

Each group of administrators expressed their training needs but the group of assistant administrators needed much more in planning procedure.

Each group, according to the needs assessment for annual operation planning, needs for more experience in developing criterion for decision making, alternative generation, prioritizing project and program, operation proceduring, processing for planning approval, monitoring, controlling and reporting.
