

## C242905 : MAJOR COUNSELING PSYCHOLOGY

KEY WORD: GROUP CAREER COUNSELING/ CAREER AWARENESS

PITI VITAYAKARN : EFFECTS OF GROUP CAREER COUNSELING ON CAREER AWARENESS IN MATHAYOM SUKSA ONE STUDENTS, PHOSAINGAM VITAYAKOM SCHOOL. THESIS ADVISOR: ASSO.PROF. WACHAREE SUPMEE, M.A. 109 pp. ISBN 974-584-498-5

The purpose of this research was to study the effects of group career counseling on the career awareness of Mathayom Suksa One Students. The samples consisted of Mathayom Suksa One Students at Phosaingam Vitayakom School, Phichit. The Subjects were assigned through purposive sampling into two groups, 10 students each for the total of 20 students. The experimental group participated in group career counseling, 2 sessions per weeks, for the total of 12 hours, one hour per each session. The researcher conducted the group by himself. The instrument used in this research was The Career Awareness Inventory. The pretest-posttest control group design was used.

The data were analysed by t.-test. Results indicated that the students participated in group career counseling showed greater increased significant at the .01 level in career awareness score than those in the control group.
