ABSTRACT

The objectives of this research are 1) to investigate socio-economic espects of the non-commission police officers under Police Command Region 4   2) to examine problems and needs of the non-commission police officers about their economic situation and families and 3) to survey proper models to promote secondary occupation of community agriculture through self-reliant of the non-commission police officers by reducing family expenses and utilizing their free time beneficially.

The case studies were composed of the non-commission police officers under Police Command Region 4. The tool used to collect data was questionnairs in discussion with both individuals and groups. The data were analysed using the SPSS/PC$^+$ computer program. Statistic value used were percentage, mean, t-test and Wilcoxon Signed Ranks Test.

Results of study

1) Socio-economic situation of target group was dramatically ameliorant, after putting interaction activities, expecially they posessed more knowledge of how to carry out secondary occupation of community agriculture through self-reliant. This could reduce family expenses and stimulate them to settle group.

2) Economic problems of target group were alleviated but requirement to gain more knowledge about secondary occupation of community agricuture through self-reliant was found.

3) The appropriate models to promote secondary occupation of community agriculture through self-reliant were required to provide knowledges, ideas and experiences, settle promoting occupation fund as well as create technical and marketing networks including regularly monitoring and evaluation.
