The purpose of this research was to study Chulalongkorn University's problems in organizing the twenty-first University Games of Thailand. The 18-division organizing committee and 23-kind of sport organizing committee were sample in this study. The questionnaires developed by the researcher were sent to the samples and the interviews were made with 5 persons from the Organizing Committee. The data were analyzed statistically in terms of means and standard deviations.

The results were as follows :

1. The 18-division organizing committee and 23-kind of sport organizing committee agreed that the purposes of the organizing of the 21st University Games of Thailand were fulfilled.
2. The 18-division organizing committee and 23-kind of sport organizing committee agreed that the problems of the organizing of the 21st University Games of Thailand were : the delay of the budget, the inadequate time in performing work, the lack of coordinating places any transportation. In planning of the games, the committee did not study about the readiness of resources in Chulalongkorn University and did not evaluate during and, also, after the games. The problems of managing and operating were at the "less" level.
