

**Title** : A STUDY OF TUTORIAL LEARNING OF MATHAYOM SUKSA 1-6  
STUDENTS UNDER THE DEPARTMENT OF GENERAL  
EDUCATION IN UTTRADIT PROVINCE

**Author** : Miss Sasithorn Khumphon

**Adviser** : Aree Tonchareanrat

**Type of Work** : Thesis (M.A. in Guidance Psychology), Naresuan University, 2000

The purpose of this study was to study the relation between the reasons of special learning with sex, grade, program of study and achievement. The examples were the 331 mathayom suksa students under department of general education in Uttradit province from stratified random sampling. The statistics were frequency, percentage and  $\chi^2$ -test

The finding were as follows:

1. The private of the students to find that the reasons of special learning are consistent with sex, grade and program of study.
2. The technique and method of teaching to find that the reasons of special learning are consistent with sex, grade and program of study.
3. The content of subject to find that the reasons of special learning are consistent with sex and grade
