The purposes of this study were to : study the condition and the expectation of the current administration of academic affairs under the responsibilities of Administration Organization in Sub-district, prompiram District, Phitsanulok Province. The population consisted of 373 people who are administer, teachers and the committee of Administration Organization in Sub-district. The samples were selected by the method of proportional stratified random sampling according to the comparative of Krejoic and Morgan. Whereupon, the collected data were analyzed through the applications of percentage, mean and standard deviation.

The findings indicated that the condition and the expectation of Academic Affairs Administration under the responsibilities of Administration in Sub-district were as follows :- in all aspects the condition was at minimum level. The maximum level was drinking water and fresh water supplied to the school and the community. But the expectation was at medium level in every aspect. Water supply for drinking and using in the school and community was still in the maximun level of the expectation. Administration Organization in Sub-district level had participated in supporting the school to be the sport center of the village and to have committee of Student Activities as the form of Administration Organization in Sub-district level
