

Title : THE DEVELOPMENT OF INSTRUCTIONAL PACKAGES FOR LEARNING
CENTERS STUDY IN LIFE EXPERIENCES AREAS PRATHOMSUKSA SIX

Author : Miss Petthal Hoontong

Adviser : Assist. Prof. Dr. Samran Mejang

Type of Work : Thesis for M.Ed. (Educational Research and Development),
Naresuan University, 1999.

The purpose of the research was to develop learning centers instructional packages in life experiences areas prathomsuksa six students which was carried out in 4 steps.

Step 1 : Survey the problems from 189 teachers who were teaching Life Experiences Areas in prathomsuksa six to fill in the questionnaires, which were later analyzed for mean and standard deviation. The finding was that the topic of the universe and space was at the high level.

Step 2 : Construct 5 instructional packages by using the data obtained from Step 1. The instructional packages were examined for suitability by 5 experts. It was found that every instructional package was at the high. The instructional packages were then experimented with 15 students. The result was that each instructional package had passed the standard criterion at 80/80 and the efficiency of all 5 instructional packages was 81.48 / 82.63

Step 3 : Experimented the instructional packages and compared them with the Teacher Handbook Method by using 31 students in each group. The achievement of the students studying with instructional packages was higher than of the students studying with Teacher Handbook Method, at the .01 level of significance.

Step 4 : Evaluate instructional packages of the input, process and output. All 4 teachers and 31 students who used the instructional packages. The teachers and students had the opinion for the instructional packages suitability of studying with instructional packages was at the high to highest level.
