

## Abstract

The research entitled “The Opinions of the Local Administration Organization’s Staff to Chaiyaphum Promotion Children Caravan Program” aimed to study on 1) the opinion and the suggestion of the local administration organization’s staff to Chaiyaphum promotion children caravan program. The data was collected from questionnaire distributing to all staff of 134 persons at the executive level. The statistical analysis was carried out by using Percentage, Means, and Standard Deviation.

It was found that from the document study of Chaiyaphum Promotion Children Caravan Program’s reports , the number of activities , persons attended the activities and budget, showed the success that caused the Local Administration Organization’s Staff has agreed with at a high level to the overall Chaiyaphum Promotion Children Caravan Program. They has agreed with at a high level to the patterns, interdisciplinary teams and activities of Chaiyaphum Promotion Children Caravan Program. These were the important factors that caused the success of the Program.

The suggestions are that the Ministry of Social Development and Human Security should develop the Chaiyaphum Promotion Children Caravan Program by supporting the staff of Chaiyaphum Promotion Children Caravan Program, and encourage more children to join in. with appreciating in social capital that existed in their communities. There should be further study in arranging activities for child development and comparing with another Tumbol. The budget should be more allocated in the Program activities. The Local Administration Organizations should extend the Program continuously.
