

SUCHART PRUANGMETHANGKUL : A DOUBLE BLIND CONTROL STUDY OF 2% KETOCONAZOLE SHAMPOO AND 2% ZINC PYRITHIONE ON TREATMENT OF DANDRUFF. THESIS ADVISOR : ASSO.PROF.PICHIT SUWANPRAKORN, Ed.D.
50 pp.

The efficacy of 2% ketoconazole shampoo and 2% zinc pyrithione shampoo were compared in the treatment of dandruff. The results at 4 weeks show that ketoconazole shampoo reduced the severity of dandruff very good 69.7%, good 30.3% whereas Zinc Pyrithione shampoo reduced excellent 1.8%, very good 67.9% and good 28.5% the pruritus was suppressed 92.67% and 94.2% in ketoconazole and Zinc pyrithione groups, respectively. The results of these study show that there is no statistically significant difference in the efficacy between both shampoo.
