

SOMRUX SAHAPONG: THE RELATIONSHIP BETWEEN THE CONTENT OF CLINICAL TEXT-BOOKS IN ENGLISH AND THE CURRICULUM OF THE FACULTY OF MEDICINE, RAMATHIBODI HOSPITAL CAMPUS. THESIS ADVISOR : ACHARN UTHAI DHUTIYA-BHODHI, ASSO. PROF. SUNDHARI HANSASUTA. 114 pp.

The purpose of this study was to find out about the relationship between the clinical text-books which were purchased through government fund in Ramathibodi Hospital Library and the medical curriculum (Doctor of Medicine) in clinical level (the fourth year to the sixth year) of the Faculty of Medicine Ramathibodi Hospital campus.

It was found that the majority of the English clinical text-books which used 1982-1986 government fund relate in content to the 33 subjects in clinical level of Faculty of Medicine Ramathibodi Hospital medical curriculum (78.73%)

The subjects RAMD 401 & RAMD 402 Principle of Medicine & Clerkship in Medicine was the subject which related to the most clinical text-books (37.85%) The second was the subject RASU 603 Traumatology (27.82%) and the third was the subject RASU 501 Clerkship in General Surgery, Cardio Surgery and Neurosurgery (20.59%). The subject to which there was not any clinical text-book relate in content was subject RAPC 502 Clerkship in Psychiatry I: Clinical.
