POTJANEE THIMSAK : THE DEVELOPMENT OF PARENT NUTRITIONAL EDUCATION ENRICHMENT PROGRAM FOR CARING UNDER STANDARD WEIGHT YOUNG CHILDREN ACCORDING TO THE PROJECT INITIATED BY H.R.H. PRINCESS MAHA CHAKRI SIRINDHORN IN SCHOOLS UNDER THE JURISDICTION OF THE OFFICE OF THE NAKHON NAYOK PROVINCIAL PRIMARY EDUCATION. THESIS ADVISOR : DR.UDOMLUCK KULAPICHITR. 270 PP. ISEN 974-579-972-6

The objective of this research is to develop the nutritional education enrichment program for parents in caring under standard weight young children according to the project initiated by H.R.H. Princess Maha Chakri Sirindhorn project in schools under the jurisdiction of the Office of Nakhon Nayok Provincial Primary Education.

Three stages of the program in this study were : 1. to design the parent nutritional education enrichment program for caring under standard weight young children ; 2. to experient the program ; 3. to improve and propose the final program.

The findings were : 1. at the end of the program, parents in the experimental group gain higher knowledge in nutrition than parents in the controlled group ; 2. the program had an effect on weight change of the under standard weight children, the number of children in the experimental group regained standard weight more than the number of children in the controlled group.

Data from the second stage of the study was used for the improvement of the final presentation of the program for caring under standard weight young children which results is 13 items of the content and proved to be an efficient program to be used in caring the under standard weight young children.
