#### ABSTRACT

The purpose of this research was to investigate the status of libraries and the audio-visual department of upper secondary schools in Bangkok, to study and compare attitudes and needs of principals, librarians and audio-visual teachers on the establishment of media center dealing specifically with the administrative organization and to study the obstacles to the establishment of media center.

The research population were principals, librarians and audio-visual teachers from 96 upper secondary schools in Bangkok, 288 copies of questionnaires were distributed and 219 copies (76.04%) were received: 71 copies (73.98%) from the principals 75 copies (78.12%) from librarians and 73 copies (76.04%) from audio-visual teachers. The questionnaire, as a research tool, was constructed in order to gain the attitudes of the respondents on the establishment of media center. The data were analyzed and presented in terms of percentages, arithmetic means and standard deviation. A comparison

4. a study on reading, reading interests or factors affecting

the reading interests of the blind children and blind adults who

never attend the school for the blind in order to learn of any deviation

in the factors and environment concerned.
