KEY WORD: THE DEVELOPMENT/SPEED READING COMPETENCY/MATHAYOM SUKSA ONE

RAWEEWAN INTARAPRAPHAN : THE DEVELOPMENT OF THAI SPEED READING  
COMPETENCY OF MATHAYOM SUKSA ONE STUDENTS. THESIS ADVISOR : PROF. SUCHARIT  
PIENCHOB, Ed. D. 436 op. ISBN 974-582-228-4

The purpose of this research was to develop the Thai speed reading competency of mathayom suksa one students.

The subjects of this research were 80 mathayom suksa one students studying in the second semester of academic year 1992 at Konsarnwithayakom School, Amphur Konsarn Changwat Chaiyapoom. They were purposively sampled. Out of this number, 40 students were selected as the experimental group the other 40 students as control group. The experimental group was assigned to practice speed reading from the speed reading competency exercise. The control group was not assigned to practice speed reading from the speed reading competency exercise. The instruments used for collecting data were 20 instructional models of the Thai language, 40 speed reading competency test with the reliability of 0.82 and 30 speed reading competency exercise. The researcher taught both groups, each group took 20 periods. After the experiment the scores of pretest-posttest were compared, t-test was used for the analysis of data.

The result showed that the speed reading competency of the experimental group was higher than the control group at the 0.05 level of significance.
