

Thesis Title	A Developing of Computer Instruction Package on Anatomy and Physiology at Rajabhat.
Thesis Credits	6
Candidate	Mr. Thana Charuphanthuset
Supervisor	Associate Professor Pairoaj Tiranathanagul
Degree of Study	Master of Science in Industrial Education
Division	Computer and Information Technology
Academic Year	1999

Abstract

The purposes of the development research were to construct the computer instruction package at Rajabhat, to evaluate the package efficiency and to determine the students achievement on learning through this package.

Thirty students participated in the experiment. These students were the first year certificate level , enrolling in Rajabhat Kanchanaburi Institute. Pre-test and posttest were conducted.

The research found that computer assisted instructional package had the 90.97/90.44 efficiency which meet the 90/90 standard, criteria. The comparison between pre-test and posttest performance of student was statistically significant difference at 0.01 level. This result of comparison indicated that the computer assisted instruction package was enable learner gaining high achievement.

Keywords : Computer Instruction Package / Efficiency / on Anatomy and Physiology.
