The purpose of this research was to study the monitoring process of
the project on expansion of educational opportunity of the Office of the
National Primary Education Commission and the Department of General Education.

Findings revealed that both the Office of the National Primary
Education Commission and the Department of General Education, Ministry of
Education, employed quite a similar monitoring process. They both used the
existing sections of the organization to carry on monitoring. Only the Office
of the National Primary Education Commission had created additional special
section within the office to take a responsibility of the project. The Office
of the National Education Commission and the Division of Planning in the
Office of the Permanent Secretary of the Ministry of Education played their
major role in evaluation rather than monitoring. It was also found that a
coordinations of monitoring system were unclearly defined. The problems were
insufficient budget, lack of good coordination of monitoring system and
insufficient personnel.
