This research were aimed at studying the management and problems of  
organizing the Education for Rural Development Project in primary schools  
under the jurisdiction of the Office of Surin Provincial Primary Education.

Research findings showed that :

With regards to the need assessment study, a project committee  
members meeting was conducted then the responsibilities were assigned to the  
assigned teacher by which the questionnaire method was used for gathering  
data, then they were analyzed through project committee members meeting on  
the basic of community needs and feasibility principle. In implementing the  
project within schools, personnel were assigned, budget, location, and  
monitoring tools were prepared. A cooperation with concerned units and  
public relation through students were also organized. Monitoring and  
evaluation were conducted by school administrator and assigned teacher  
within school, and the readiness of every step within the project  
implementation was evaluated then the report was prepared once a semester.

Concerning the problems in organizing the project they were;  
insufficient amount of budget, lack of knowledge in needs assessment and  
activities organizing among personnel, limited plant location, activities  
guidelines, and qualified personnel. Lack of information system was also  
reported to be a problem.
