

LIST OF TABLES (continue)

Table		Page
9	Mean \pm SE of motility, viability and motion characteristics of spermatozoa in poor-motile semen after being incubated in various concentrations of PTX (0 to 2.0 mg/ml) for 15 or 30 min.	56
10	Effect of PTX treatment on motility, viability and motion characteristics of spermatozoa in low-motile semen.	57
11	Annealing temperature, size range and results of DNA sequencing of 22 elephant microsatellite markers.	64
