As a matter of fact, the process of investigation for finding fact and evidence in taking a logical step to the offender may effect to the right of the citizen and study on this matter also makes more confidence to the officers on under colour of their offices because the legal provisions and the policy on the said investigation are not quietly clear. Probably course in committing crime is main reason for the officers in the investigation for finding fact and evidence so eaves dropping and use of binocular for watching from a far are needed by secret agent. This may also effect to the right of the suspected of crime. Finally if it appears that he is not offender he may use the officer or state for making claim.

This thesis focusses on the investigation that inflicts people liberty so it consists of ideas theories and history of process of investigation in Thailand and foreign countries. So two main theories for Criminal Justice Administration are also needed to analyse for this thesis. They are theories of Crime Control Model and Due Process Model.

However, both enforcing agent and enforcers are very important for the process of investigation for finding fact and evidence. So it needs the development on both of them to achieve the purpose of reducing crime and protecting the right of citizen.

This thesis indicates the rightful process of investigation and State's policy on administration of this process which must be clear and also develop both of law and enforcing agent.
