

ABSTRACT

Title **Effect of foreign workers. To offer guidance to prepare for ASEAN
Community: A Case Study of Chiang Mai Province.**

Field **Economics**

Name **Maj.Gen. Poompipat Chaweepat** **Course NDC Class 54**

AEC will occur in the year 2558, which will take effect. And affect normal life in many ways. In particular, the flow of migrants. The research study is to organize migrant workers. To be ready. And as the country enters the ASEAN Community. Development and application of the solution to workers in other areas of economic research shows that: Chiang Mai should be administered in the form of a special rule. Which is in the form of "Economical Zone Manager" / human security: the need for public health services. And health of workers. It is important to assess equity in access to the human / environment: Migrant Workers in Thailand. To cause disease. Warren is a problem of the integration of migrants into the community. Chiang Mai. This will create problems in the future and security. The spread of disease. Crime / politics: the area is restricted to registered outside the labor force. When the problem. Requests for the rest of the week. It is going to be difficult. Researchers have suggested the following: 1. Chiang Mai should have created special economic policies. 2. Should take measures to both old and new foreign workers legally 3. Should provide policy space "point zero" to provide information on migrants in the fourth spot. 4. Should have a PR plan. To build an understanding of the process of hiring foreign workers 5. Should be intensive measures - to prove citizenship. Terminate the waiver. Getting a work permit. Health and health 6. Should use IT systems to improve the collection of information instead of the complete document. 7. Monitor the epidemic acute closely 8. Should launch health insurance for foreign workers. Do not have access to social security or insurance, etc. 9. Provinces should deal with health insurance all under the same standards and 10. Should have a workshop (Workshop) to reduce friction, reduce confusion agencies involved.
